

24 October 2022

Queensland Beekeepers' Association

Weekly Varroa Mite Update – Week Ending 19/10/2022

The detection of *Varroa destructor* in Newcastle on the 22nd June 2022 has created much anxiety within the Australian beekeeping industry. In an effort to streamline our communications to our members the QBA will now offer weekly updates to our members and affiliate clubs giving insight into our current areas of focus.

We actively encourage all beekeepers to undertake varroa mite surveillance activities on managed hives and report the results (including negative results) to the Bee 123 portal. For more information on the Bee 123 portal please click [here](#).

Weekly Update 19th October 2022

Bee 123 data to date:

Total beekeepers reporting results	347
Total Hives checked	3090
Total hives reported	11482
Total No. of Recreational Beekeeper Surveys:	250
Total No. of Commercial Beekeeper Surveys:	93
Mites found or suspected	0

Bundaberg Pollination Event Varroa Mite Surveillance:

**Surveillance activities: alcohol wash, drone uncapping and frame inspection.*

Total Apiaries/Beekeepers tested:	8
Total Hives Inspected:	224
Total Hives Present at surveillance locations:	2413
Total No. locations/properties surveyed:	8

Key Points:

- Biosecurity Instrument Permits for movement into in Qld of beehive supers for extraction, used hives for irradiation and apiary equipment and PPE from the NSW GEZ ('Blue Zone') have been developed and are being issued.
- Permit conditions and information have been added to the [DAF eHub](#)
- Permit applications to date (since 9/9/2022):
- 33 received
- 19 permits issued

- 5 not approved
- 9 in progress
- Permit conditions for movement of queen bees from interstate and NSW blue zone are in final stages of being developed.
- A *Compliance Sub Plan - Varroa mite response* has been developed to establish a functional response program to ensure there is a structured approach to managing the risks presented by a Varroa mite incursion into Queensland.
- The webinar held on 11 October 2022 in collaboration with the Queensland Beekeepers Association has been published to [YouTube](#) and the DAF varroa Preparedness eHub. Several questions were asked at the webinar and the answers will be added to the eHub and distributed soon.
- DAF is continuing communication activities via social media and newsletters to provide information on general hive health and encourage reporting test results to Bee123.
- Over the weekend of 15 & 16 October 2022, Queensland's Bee Biosecurity Officer visited Whitsunday Beekeepers at Proserpine and the Townsville & District Beekeepers at Townsville for Varroa updates and reporting in Bee123.
- **Upcoming Events**
- Practical Day demonstrations by Biosecurity Queensland's Bee Biosecurity Officer are scheduled:
- 6 November 2022 with Ipswich and West Moreton Beekeepers at Ipswich.
- 19 November 2022 with Gold Coast Regional Beekeepers at Nerang.

AHBIC

AHBIC is seeking further expressions of interest from beekeepers willing to volunteer to assist with control operations for the current Varroa biosecurity emergency.

Volunteer beekeepers have been a vital part of the varroa response, and their assistance is greatly appreciated.

Volunteers are not paid for their time, but travel, food and accommodation will be provided, and travel and food costs will be reimbursed.

Operations are currently being carried out at Narrabri, Coffs Harbour and the Hunter region. Volunteers are invited to select their preferred destination, but won't necessarily be deployed to their chosen location.

Please note that volunteers must be members of an AHBIC member body, so please do not share this form publicly.

Beekeepers must register their interest on the on-line form. Click [here](#) to download the on-line form.

Upcoming Events

- Workshops and Practical Day demonstrations by Biosecurity Queensland's Bee Biosecurity Officer are scheduled:
 - 6 November 2022 with Ipswich and West Moreton Beekeepers at Ipswich.

- 19 November 2022 with Gold Coast Regional Beekeepers at Nerang

Past Events:

The recording of AHVIC's online webinar held on 31 August 2022 can now be watched from your computer or electronic device. Please [click here](#) to watch the presentation.

The recording of the Varroa Mite Biosecurity Queensland webinar held on Tuesday 11th October is now available online and ready for beekeepers to watch at their leisure. This webinar covers topics relating to the current situation update in Queensland, reporting your surveillance results to the Bee 123 app, and applying for a permit to move honey supers, equipment for irradiation and the movement of PPE. Please [click here](#) to watch the webinar.

QBA Membership:

The Queensland Beekeepers' Association warmly welcome new members to our organisation. To complete an application for membership please visit <https://members.qbabees.org.au/join-us/>

When completing your application, please nominate your preferred branch of the QBA.
