

## Queensland Beekeepers' Association

### Weekly Varroa Mite Update – 27 July 2023

The detection of *Varroa destructor* in Newcastle on the 22<sup>nd</sup> June 2022 has created much anxiety within the Australian beekeeping industry. In an effort to streamline our communications to our members the QBA will now offer weekly updates to our members and affiliate clubs giving insight into our current areas of focus.

### Fortnightly Update 27 July 2023

#### Bee 123 data to date:

Total beekeepers reporting results	994
Total Hives checked	17309
Total hives reported	84025
Total No. of Recreational Beekeeper Surveys:	508
Total No. of Commercial Beekeeper Surveys:	481
<b>Mites found or suspected</b>	<b>0</b>

## Biosecurity Queensland and QBA fortnightly update 27 July 2023

### QBA Weekly Update – 28/07/2023

- As of 28<sup>th</sup> July 2023, the total numbers of IP's are at 194, with continued priority testing in the EEZ and SEZ established around Gumble in NSW
- Queensland continues to operate as a Varroa mite biosecurity zone.
- BQ encourage all beekeepers to continue to monitor hive health and continue entering results into Bee123. There have been excellent testing results entered in BEE 123 recently
- Victoria and South Australia are issuing permits for those attending Almond pollination events within those states. When transiting through NSW please ensure you have the appropriate movement declaration requirement approved.
- Please contact each state for their exact requirements.
- Currently there is no requirement for beekeepers returning from Victoria or South Australia to have a Biosecurity Instrument Permit. This will change if there is a VM detection within these States and a permit will be required. NSW will require notification to transit NSW. Please contact NSW, Vic, and SA to make sure of the relevant States positions.
- There have been 19 health certificates issued for 14,660 hives to leave Queensland to attend Almond pollination in Victoria and South Australia.
- There is a CCEPP meeting scheduled for the 31<sup>st</sup> July 2023

### Biosecurity Instrument Permit applications completed

○ Approved	184
○ In progress	15

- Not approved/available 12
- Total completed 157

## Permit condition compliance inspections

The Varroa Mite Prevention and Preparedness Program (VMPPP) continues to manage ongoing permitting and compliance requirements for the movement of bees and related varroa mite carriers into Queensland. The VMPPP includes two dedicated Senior Biosecurity Officers whose operational duties encompass surveillance and compliance activities, as well as a dedicated Permitting Officer to oversee bee-related movement applications.

## Communications

- Additional communication material is being prepared to encourage beekeepers to check their hives and report to Bee 123:
- DAF continues to meet with the QBA and industry partners fortnightly to discuss progress with prevention activities to support keeping Queensland free of varroa mite.

## Bee 123 QLD Surveillance Dashboard Map 27 July 2023

The map below illustrates the current distribution of varroa mite surveillance activities reported to the Bee 123 portal. The QBA and DAF urge all beekeepers across Queensland to complete varroa mite surveillance activities immediately and report their results (including negative results) to the portal.

The blue dots represent negative surveillance results from **994** varroa mite surveillance activities reported to the Bee 123 portal since the 13<sup>th</sup> of July 2022.

Please see the page below to review the current distribution of varroa mite surveillance reports as collated from data collected from the Bee 123 portal.
